

Enviroshake[®]

Quality Engineered Roofing

CONTRACTOR FACTORY TRAINING PROCESS

Before Enviroshake will fully Factory Train a Contractor Partner, the following conditions must be met.

1. Contractor to attend the Factory Training webinar:
2. Complete Factory Training test with 90% correct responses. **A letter of test completion will then be sent, and you are now approved to install Enviroshake[®] Products.**
3. Once the Contractors' first project has been completed, there are two conditions that must be met.
 - a. The post-install survey must be completed with an Enviroshake representative
 - b. A set of pictures must be submitted to Enviroshake for a visual audit
4. Upon completion of the above conditions, the Installer will then become a fully Factory Trained Enviroshake Installer, and an official certificate will be sent out.

The Installer will need to sign a document that confirms that on ALL Installations that a Factory Trained Installer is overseeing the Project. There must be at least one Factory trained Installer on a job at all times. Should this not happen, the warranty will not apply.
